Cone 5-6 oxidation. They are made for anyone who would like to achieve the Cone 10 reduction effects without having to fire with a reduction atmosphere.

Special application instructions:

PC-20: Blue Rutile needs to be applied heavily. Apply at least four coats. It will flow just a little and create beautiful effects.

PC-50: Shino needs to be applied irregularly. Apply 2 irregular coats. Once you have used it awhile you will see the effects that you can get by varying the application.

PC-60: Salt Buff has to be applied on the thin side. No more than two irregular coats are needed to get the random effect of salt glazing.

Influenced by the humble earthiness of tea ceremony bowls, our Shino glazes give a traditional high-iron look to any high fire clay body. Beautiful on textured or smooth clay bodies, blendable to get the right degree of matte or glossy surface. Shino glazes can also be layered with our PC line of glazes for different effects.
