**Big Blue Extruder**

## BIG BLUE EXTRUDER (6" square barrel)

- Wagon wheel handle and compound gear drive makes it possible for anyone to make large extrusions with ease.
- Wagon wheel handle is held in place with a pin, so a quick release and a pull sets the handle aside should it be in the way.
- The barrel and die lift out as a unit (no tools), so that cleaning, loading, and die changing can be done while you sit or stand at your workbench.
- The barrel is heavy-walled aircraft aluminum. Only this and stainless steel can come in contact with the clay. The housing is powder-coated steel and stainless steel. All gears and the gearbox are solid steel, which is either powder-coated or zinc plated.

<u>Stock #</u>	<u>Item</u>	<u>Description</u>	<u>Wt.-lbs.</u>	<u>Price</u>
